INTERNATIONAL SCHOOL AWARD

It was a proud moment for our school when we received the International School Award (ISA) by the British Council for the year 2018-21. In an award function organized by the British Council in Bangalore, school principals and teachers received the three-year accreditation. "It is indeed a great achievement for us. This will also help us to get global recognition. The comprehensive effort made by the school administration, teaching and non-teaching staffs and the students resulted in winning this recognition," said Ms. Manoja after receiving the award. This accreditation scheme recognizes and celebrates exemplary practices of internationalism in schools. It provides a framework for cradles to develop an action plan and implement international activities around the year. It also urges schools to innovate with overseas schools on creative teaching practices and real-time global learning.

The schools have worked on various projects that were designed for each class. Right from food, costumes, dolls, environment, handicrafts, geography, education system, and school students guided by their teacher coordinators got involved in a number of fun-filled activities while applying for the programme. Officials from British Council informed that a total of 174 schools in India have been so far accredited this year. The range of schools participating in the International School Award varies from the well-resourced private schools to government schools from rural areas and schools for the less advantaged communities. The International School Award now has a presence in 31 countries worldwide. Key benefits of getting the International School Award: It has a positive impact on not just the students, but also the teachers and school in entirety.

Keeping this in view, Vikas club conducted the Fancy Dress Competition for the children. The purpose of conducting the competition was not only to blend learning with fun but also to develop confidence in the students by giving them an opportunity to get on the stage and speak in front of an audience. Children dressed up in their colorful costumes and spoke a few sentences on the character that they depicted. The effort and hard work of children were highly commendable.

TERRACE GARDEN TAKE ROOTS AT OUR SCHOOL CAMPUS

Learning happens when you engage a student in an environment where they evolve with active thinking and understanding. In the bustling school campus, a group of students is busy getting their hands dirty with mud. For the past few months, there have been a lot of activities done on the school terrace. Our students have set up a new rooftop garden which serves as an outdoor classroom to learn about the home growing of vegetables. This lushly green rooftop garden is now also a green laboratory, providing students a chance to observe nature, learn about the ecosystem and to conserve the environment. The first harvest of radish and beans added to our excitement and motivated the students to expand our organic terrace garden. Students just love it!
